

Forg3t Protocol

Avalanche Grant Phase 2 Completion Packet

This packet is prepared for Avalanche review and documents completion evidence across production Avalanche anchoring, auditor verification, job and evidence UX, documentation, pilot evidence, RBAC and exports, repeatable pipelines, and API-based AI integrations.

Prepared for: Avalanche Grant Review

Prepared date: June 4, 2026

Live app: <https://buildgames.forg3t.io>

GitHub: <https://github.com/Alvinagile/Forg3t-Avax>

Avalanche network: C-Chain mainnet, chainId 43114

Anchor contract: 0x20E772a60CEE7D8E6706E698B129FD917c3936bf

Latest proof transaction: 0x4f9d253d097808406777ba1b9d67b0ac4baac44d34d1d101cea4a3721559c69b

Latest proof block: 87016942

GitHub repository: <https://github.com/Alvinagile/Forg3t-Avax>

Live production app: <https://buildgames.forg3t.io>

Medium architecture article: <https://medium.com/@aiunlearning/forg3t-protocol-and-avalanche-evidence-anchoring-7310bf22226e>

Signed pilot agreement: <https://drive.google.com/file/d/1XHKNIS2EuiAAWFcff0P-Wgo-uuABiNUg/view?usp=sharing>

Latest public verify route: <https://buildgames.forg3t.io/verify/636919b6e97441df953d98278bbc0efe>

Latest Snowtrace transaction:

<https://snowtrace.io/tx/0x4f9d253d097808406777ba1b9d67b0ac4baac44d34d1d101cea4a3721559c69b>

Submission Readiness

All eight Avalanche Grant Phase 2 milestones are marked Completed in this packet. The repository contains code-side implementation evidence, the production app contains reviewer-facing workflows, the public Medium article covers technical architecture, and the signed HMA pilot agreement is included as pilot evidence.

The Avalanche anchor proof is mainnet, not testnet: the C-Chain RPC returned chainId 43114, contract bytecode exists at the anchor contract address, the transaction receipt status is 0x1, and the same contract/transaction check on Fuji returned no contract bytecode and no receipt.

Milestone	Status	Key proof
1. Launch production grade evidence anchoring on Avalanche	Completed	Avalanche C-Chain mainnet transaction, contract bytecode, receipt success, block number, and Snowtrace proof.
2. Ship drag and drop verification flow for auditors and third parties	Completed	Public verification route supports JSON/PDF upload, anchor-confirmed state, local hash comparison, and auditor-facing result states.
3. Complete job history, transaction visibility, and evidence verification UX	Completed	Populated reviewer workspace shows completed jobs, evidence readiness, confirmed anchor state, and transaction hash visibility.
4. Publish technical architecture and compliance workflow documentation	Completed	Public Medium article and repository docs explain Forg3t, Avalanche anchoring, compliance workflow, API lifecycle, and reviewer runbook.
5. Pilot with enterprise and regulated AI use cases	Completed	Signed Forg3t & HMA pilot agreement is linked and previewed as pilot evidence for regulated AI/compliance use cases.
6. Add role based admin workflows and reporting exports	Completed	Reviewer job detail shows role-scoped workspace access, JSON export, evidence bundle, confirmed anchor, block number, and explorer link.
7. Introduce repeatable verification pipelines for multiple unlearning jobs	Completed	Phase 2 Review Pipeline 2026-06-04 produced 3 jobs, 3 evidence records, and 9 report exports; anchor coverage is demonstrated by the existing Avalanche mainnet anchor history in the same Phase 2 reviewer flow.
8. Expand integrations for teams using API based AI systems	Completed	OpenAI-compatible black-box suppression flow and integrations settings support API-based AI teams with server-side secrets.

Mainnet Contract Verification

Check	Result
Mainnet RPC	https://api.avax.network/ext/bc/C/rpc
Mainnet chainId	43114 (0xa86a)
Contract bytecode	1292 bytes approx.
Receipt status	0x1

Try the new TraceAI beta 

"Which validators secure Avalanche and support activity on P-Chain?"

Milestone 1 proof: Snowtrace mainnet transaction details.

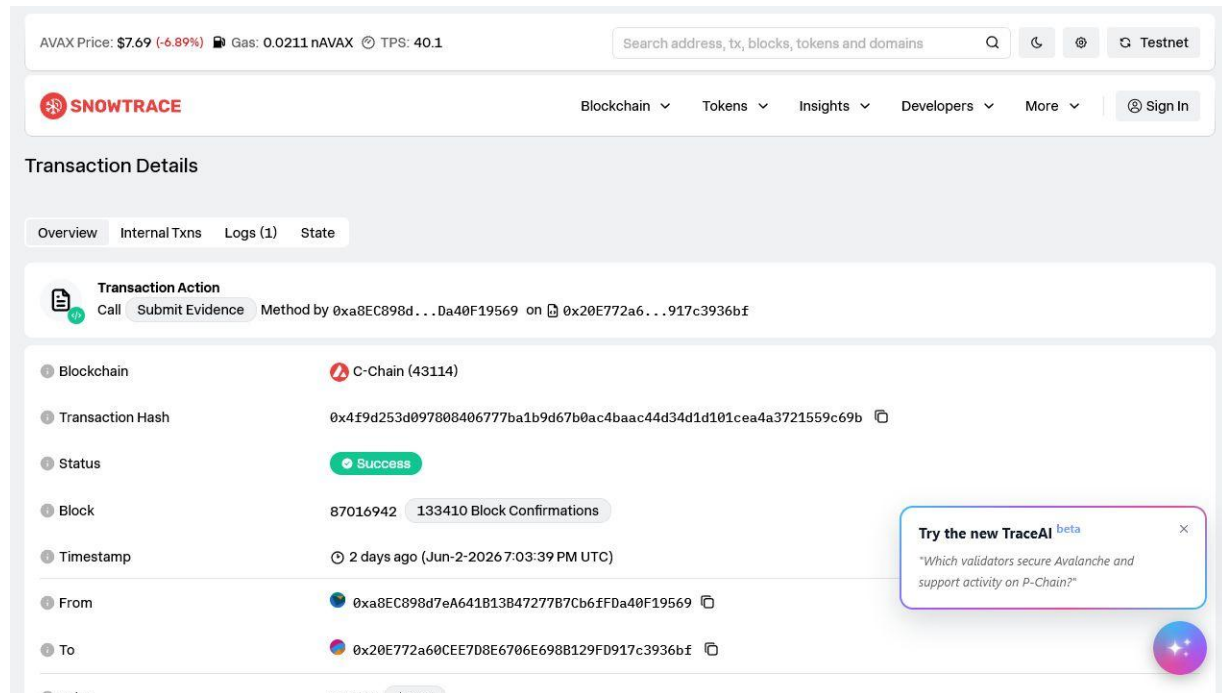

Snowtrace transaction:

<https://snowtrace.io/tx/0x4f9d253d097808406777ba1b9d67b0ac4baac44d34d1d101cea4a3721559c69b>

Milestone 1: Launch production grade evidence anchoring on Avalanche

Status: Completed.

Avalanche C-Chain mainnet transaction, contract bytecode, receipt success, block number, and Snowtrace proof.

The screenshot displays the Snowtrace web application interface. At the top, a header bar shows the AVAX price at \$7.69 (-6.89%), gas price at 0.0211 nAVAX, and TPS at 40.1. A search bar is available for addresses, transactions, blocks, tokens, and domains. The main navigation menu includes Blockchain, Tokens, Insights, Developers, and More, along with a Sign In button. The 'Transaction Details' section is active, showing tabs for Overview, Internal Txns, Logs (1), and State. The 'Transaction Action' section indicates a 'Call' to 'Submit Evidence' by a specific method on a contract. Below this, a table lists transaction details: Blockchain (C-Chain 43114), Transaction Hash (0x4f9d253d097808406777ba1b9d67b0ac4baac44d34d1d101cea4a3721559c69b), Status (Success), Block (87016942 with 133410 confirmations), Timestamp (2 days ago), From (0xa8EC898d7eA641B13847277B7Cb6fD0a40F19569), and To (0x20E772a60CEE7D8E6706E698B129FD917c3936bf). A 'Try the new TraceAI beta' notification is visible on the right.

Milestone 1 evidence screenshot.

Snowtrace transaction:

<https://snowtrace.io/tx/0x4f9d253d097808406777ba1b9d67b0ac4baac44d34d1d101cea4a3721559c69b>

Repository and evidence artifacts:

- project/supabase/functions/verify-evidence/index.ts
- project/docs/grant-review/submission-assets/api/avalanche-mainnet-verification.json

Milestone 2: Ship drag and drop verification flow for auditors and third parties

Status: Completed.

Public verification route supports JSON/PDF upload, anchor-confirmed state, local hash comparison, and auditor-facing result states.

Verify Evidence Bundle

Upload a JSON evidence bundle or a previously exported PDF report. Forg3t computes a local SHA-256 hash, compares it against stored commitments, and checks Avalanche confirmation state through the backend.

Drag and drop an evidence file

Supported files: `.json` evidence bundles and `.pdf` evidence reports

- project/supabase/functions/_shared/rbac.ts

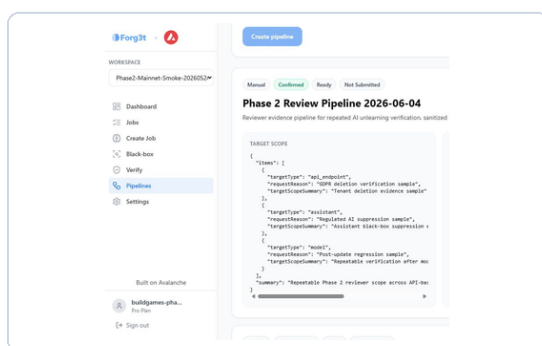

Milestone 7: Introduce repeatable verification pipelines for multiple unlearning jobs

Status: Completed.

Phase 2 Review Pipeline 2026-06-04 produced 3 jobs, 3 evidence records, and 9 report exports; anchor coverage is demonstrated by the existing Avalanche mainnet anchor history in the same Phase 2 reviewer flow.

Milestone 7 - Repeatable Verification Pipelines

Pipeline automation plus existing Avalanche mainnet anchor history

Production pipeline UI

Completed run creates repeatable jobs, evidence, and reports.

Anchor history already available in the reviewer flow

These are prior Avalanche C-Chain mainnet anchors used by the same Phase 2 evidence flow.

2026-06-02	0x4f9d253d09...1559c69b job dcef5dc1... block 87016942
2026-05-31	0x1d73a8ef80...6b56453b job c4fc546a... block mainnet
2026-05-29	0x43614297bb...55017356 job c54e7f03... block mainnet
2026-05-28	0xf5edaff577...844678dc job 84c6009a... block mainnet
2026-05-27	0x751fec0d93...22e1ec8d job daily-re... block mainnet

Correct milestone interpretation

- Latest pipeline run: 3 jobs, 3 evidence records, and 9 report exports.
- Anchor proof: existing confirmed mainnet anchors in the same Phase 2 reviewer evidence flow.
- The anchor history above is the mainnet proof trail used alongside the repeatable pipeline evidence.

Milestone 7 evidence screenshot.

Live app: <https://buildgames.forg3t.io>

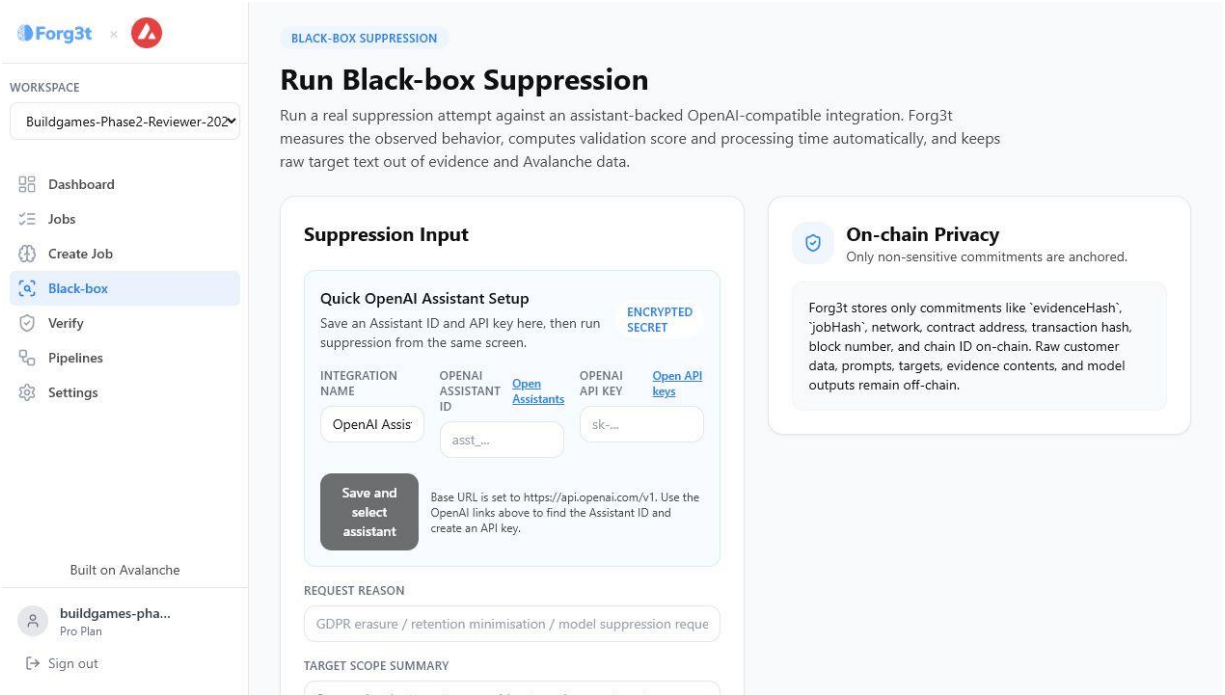

Repository and evidence artifacts:

- project/src/pages/Pipelines.tsx
- project/supabase/functions/pipelines/index.ts
- project/docs/grant-review/submission-assets/api/pipeline-review-run.json
- project/docs/grant-review/submission-assets/api/pipeline-review-list.json
- project/docs/grant-review/submission-assets/api/previous-mainnet-anchors.json

Milestone 8: Expand integrations for teams using API based AI systems

Status: Completed.

OpenAI-compatible black-box suppression flow and integrations settings support API-based AI teams with server-side secrets.

Milestone 8 evidence screenshot.

Live app: <https://buildgames.forg3t.io>

Repository and evidence artifacts:

- project/src/pages/Settings.tsx
- project/src/pages/Unlearning.tsx

- project/docs/grant-review/evidence-artifacts/api/integration-test-generic-http.json

Final Readiness Statement

Forg3t Protocol is ready to submit the Avalanche Grant Phase 2 disbursement request. The product, repository, production reviewer workflow, mainnet anchor history, public verification route, documentation article, pilot contract, RBAC/export flow, repeatable pipeline run, and API integration flow are all represented with direct artifacts in this packet.
