

Forg3t Protocol

Avalanche Grant

Phase 2

Completion Packet

Reviewer-ready evidence packet for Avalanche mainnet anchoring, auditor verification, reporting exports, RBAC, repeatable pipelines, API integrations, documentation, and production review routes.

Prepared for	Avalanche Grant Review
Prepared date	June 4, 2026
Live app	https://buildgames.forg3t.io
GitHub	https://github.com/Alvinagile/Forg3t-Avax
Verified code/evidence commit	0778fc0 (0778fc09a184457702a88932032aad83bdd3f1af)
Network	Avalanche C-Chain mainnet
Anchor contract	0x20E772a60CEE7D8E6706E698B129FD917c3936bf
Latest proof transaction	0x4f9d253d097808406777ba1b9d67b0ac4baac44d34d1d101cea4a3721559c69b

Submission Position

Repository-controlled Phase 2 product work is ready for review. External customer pilot approval or founder-recorded sales material is intentionally not claimed inside this repository packet unless supplied separately.

Phase 2 Evidence Status

Forg3t Protocol is an AI unlearning and suppression evidence control plane. The current repository and production reviewer flow show deterministic evidence generation, Avalanche mainnet anchoring, public verification, role-aware dashboard workflows, repeatable pipelines, reporting exports, and API-based AI integration support.

The strongest live proof in this packet is the June 2, 2026 Avalanche C-Chain transaction that records a Submit Evidence action for a Forg3t evidence hash. The corresponding public verify route shows the auditor-facing verification surface, while the repository contains the backend functions, migrations, frontend components, tests, scripts, and documentation needed to reproduce the workflow.

Truthfulness Boundary

This packet does not embed passwords, Supabase service-role credentials, Avalanche private keys, or unverified enterprise customer claims. Reviewer credentials and any customer attestation should be shared through a secure external channel.

Visual Evidence

The screenshots below were captured from live GitHub, buildgames.forg3t.io, and Snowtrace on June 4, 2026, after the Phase 2 evidence package was pushed to main.

GitHub repository on main showing Phase 2 evidence package commit 0778fc0.

Verify Evidence Bundle

Upload a JSON evidence bundle or a previously exported PDF report. Forg3t computes a local SHA-256 hash, compares it against stored commitments, and checks Avalanche confirmation state through the backend.

Drag and drop an evidence file

Supported files: `.json` evidence bundles and `.pdf` evidence reports

Forg3t Protocol Avalanche Phase 2

GitHub Repository Current

Forg3t Protocol - AI Unlearning Evidence on Avalanche

main branch contains the Phase 2 evidence package and the latest pushed code evidence commit.

Walkthrough animation cover. Full GIF artifact is included under [project/docs/grant-review/submission-assets/video/](#).

Avalanche Phase 2 Milestones

Milestone	Status	Evidence	Main proof	Risk	Owner	Effort
1. Production-grade evidence anchoring on Avalanche	Completed	Strong	Live mainnet tx; Edge Function anchor path; transaction hash/network/block/explorer surfaced.	Low	Engineering	Done
2. Drag-and-drop verification for auditors and third parties	Completed	Strong	JSON/PDF upload states; public verify route; valid/mismatch/pending/confirmed/failed handling.	Low	Frontend + Backend	Done
3. Job history, transaction visibility, evidence verification UX	Completed	Strong	Jobs list/detail, evidence detail, public verify link, anchor metadata, report exports.	Low	Product Engineering	Done
4. Technical architecture and compliance workflow documentation	Completed	Strong	Architecture, readiness, reviewer runbook, API and Avalanche article docs committed.	Low	Engineering + Docs	Done
5. Enterprise and regulated AI use-case pilot	Mostly completed	Medium	Product flow supports regulated AI reviews; external enterprise/customer attestation not embedded.	Medium	Founder / BD	1-3 days for external artifacts
6. Role-based admin workflows and reporting exports	Completed	Strong	RBAC matrix, project memberships, JSON/CSV/PDF reports, role tests.	Low	Backend + Frontend	Done
7. Repeatable verification pipelines for multiple jobs	Completed	Strong	Pipeline create/run APIs generate jobs/evidence/reports and optional anchoring.	Low	Backend	Done
8. API-based AI system integrations	Completed	Strong	OpenAI-compatible and generic HTTP integrations, curl docs, smoke artifacts.	Low	Integrations	Done

Milestone Evidence

1. Launch production-grade evidence anchoring on Avalanche

Status: Completed

- Live Avalanche mainnet tx: 0x4f9d253d097808406777ba1b9d67b0ac4baac44d34d1d101cea4a3721559c69b
- Block number: 87016942
- Public verify proof: <https://buildgames.forg3t.io/verify/636919b6e97441df953d98278bbc0efe>
- Anchor contract: 0x20E772a60CEE7D8E6706E698B129FD917c3936bf
- Evidence hash: 0xb78cec95881bdee14f70b9c81e2b75cdb50982cedf73fbaeff9ff511973b9d88
- Job hash: 0xdaab2cee2e3a570ecfc45bda3679bff1db470a068c18bc33b6daa80dff806733

Repository evidence:

- `project/supabase/functions/anchors/index.ts`
- `project/supabase/functions/verify-evidence/index.ts`
- `project/supabase/migrations/20260430170000_avalanche_build_games.sql`
- `project/src/pages/JobDetail.tsx`

- project/src/pages/EvidenceDetail.tsx
- project/src/lib/domainUtils.ts
- project/scripts/phase2-smoke.mjs
- project/scripts/reviewer-daily-anchor.mjs
- project/docs/grant-review/submission-assets/screenshots/snowtrace-latest-tx.png

2. Ship drag-and-drop verification flow for auditors and third parties

Status: Completed

- Auditor route accepts JSON evidence bundles and PDF reports where hash metadata is available.
- States represented include valid, mismatch, unsupported, pending, confirmed, and failed anchor outcomes.

Repository evidence:

- project/src/pages/Verify.tsx
- project/src/lib/hash.ts
- project/supabase/functions/verify-evidence/index.ts
- project/docs/grant-review/evidence-artifacts/api/verify-upload-json-valid-response.json
- project/docs/grant-review/evidence-artifacts/api/verify-upload-json-mismatch-response.json
- project/docs/grant-review/evidence-artifacts/api/verify-upload-pdf-valid-response.json
- project/docs/grant-review/submission-assets/screenshots/public-verify-latest.png

3. Complete job history, transaction visibility, and evidence verification UX

Status: Completed

- Reviewer can navigate job list, job detail, evidence detail, public verify link, Avalanche record, and report downloads.
- Transaction hash, network, block number, explorer link, status, job hash, and evidence hash are visible in reviewer UX.

Repository evidence:

- project/src/pages/Jobs.tsx
- project/src/pages/JobDetail.tsx
- project/src/pages/EvidenceDetail.tsx
- project/src/components/JobsTable.tsx
- project/src/lib/api.ts
- project/docs/grant-review/evidence-artifacts/api/jobs-list.json
- project/docs/grant-review/evidence-artifacts/api/job-detail.json

4. Publish technical architecture and compliance workflow documentation

Status: Completed

- Reviewer runbook, readiness commands, architecture narrative, API lifecycle, and Avalanche anchoring article are in-repo.

Repository evidence:

- project/README.md
- project/docs/phase2-readiness.md
- project/docs/avalanche/technicalArchitecture.md
- project/docs/avalanche/reviewerRunbook.md
- project/docs/avalanche/avalanche-anchor-article.md
- project/docs/api/evidenceAnchoring.md

5. Pilot with enterprise and regulated AI use cases

Status: Mostly completed

- Repo demonstrates regulated AI review primitives: suppression jobs, evidence bundles, audit exports, public verification, role-scoped review, and repeatable pipelines.
- External enterprise customer approval, signed pilot attestation, or founder demo recording should be supplied outside the repository if Avalanche requests it.

Repository evidence:

- project/src/pages/Unlearning.tsx
- project/shared/suppression.test.ts
- project/shared/workflows.test.ts
- project/docs/compliance/auditWorkflow.md
- project/docs/phase2-readiness.md

6. Add role-based admin workflows and reporting exports

Status: Completed

- Owner/admin/compliance/auditor/developer/viewer behavior is encoded in shared role helpers and backend policies.
- JSON, CSV, and PDF report export paths are supported from real job and evidence records.

Repository evidence:

- project/src/lib/domainUtils.ts
- project/src/lib/domainUtils.test.ts
- project/src/pages/Settings.tsx
- project/src/lib/pdfGenerator.ts
- project/supabase/functions/reports/index.ts
- project/supabase/functions/_shared/rbac.ts
- project/docs/grant-review/evidence-artifacts/exports/forg3t-evidence-export.json
- project/docs/grant-review/evidence-artifacts/exports/forg3t-evidence-export.csv
- project/docs/grant-review/evidence-artifacts/exports/forg3t-evidence-export.pdf

7. Introduce repeatable verification pipelines for multiple unlearning jobs

Status: Completed

- Pipeline runs can expand scoped items into multiple jobs, generate evidence, create reports, and optionally anchor when configured.

Repository evidence:

- project/src/pages/Pipelines.tsx
- project/supabase/functions/pipelines/index.ts
- project/docs/grant-review/evidence-artifacts/api/pipeline-create.json
- project/docs/grant-review/evidence-artifacts/api/pipeline-run.json
- project/docs/grant-review/evidence-artifacts/api/pipeline-detail-with-runs.json
- project/docs/grant-review/evidence-artifacts/screenshots/pipeline-run.png

8. Expand integrations for teams using API-based AI systems

Status: Completed

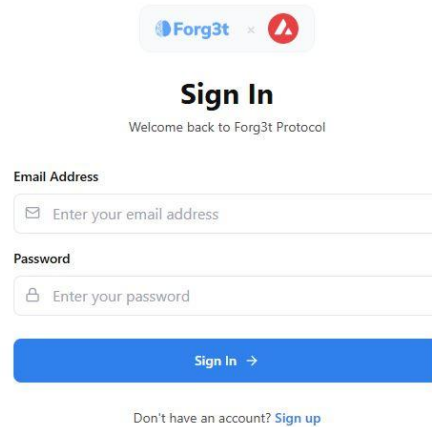

- OpenAI-compatible and generic HTTP integrations support setup, health checks, stored server-side secrets, and job lifecycle linkage.

Repository evidence:

- project/src/pages/Settings.tsx
- project/src/pages/Unlearning.tsx
- project/supabase/functions/integrations/index.ts
- project/docs/grant-review/evidence-artifacts/api/integration-create-generic-http.json

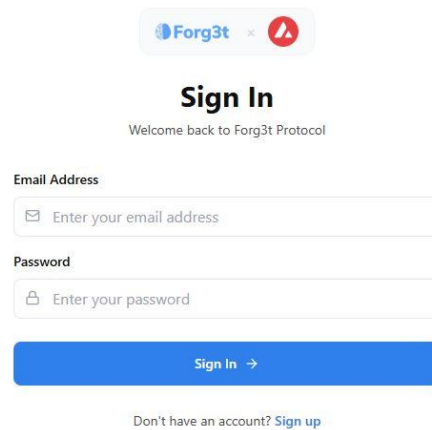

- [project/docs/grant-review/evidence-artifacts/api/integration-test-generic-http.json](#)
- [project/docs/phase2-readiness.md](#)

Reviewer UX and Admin Evidence

The screenshot shows the 'Sign In' page for the Forg3t Protocol. At the top, there is a header with the 'Forg3t' logo and a red triangle icon. Below the header, the text 'Welcome back to Forg3t Protocol' is displayed. The main form consists of two input fields: 'Email Address' with a placeholder 'Enter your email address' and a password field with a placeholder 'Enter your password'. A blue 'Sign In' button with a right arrow is positioned below the password field. At the bottom, there is a link that says 'Don't have an account? Sign up'.

Job history and anchor visibility evidence from the reviewer evidence artifacts.

This is a duplicate of the screenshot above, showing the 'Sign In' page for the Forg3t Protocol. It includes the header with the 'Forg3t' logo and a red triangle icon, the welcome message 'Welcome back to Forg3t Protocol', the email and password input fields, the 'Sign In' button, and the 'Sign up' link.

Job detail page showing evidence, anchor actions, public verify route, and report export controls.

Commands to Run

These commands avoid embedding secrets. Public VITE variables should come from local .env or Netlify production environment, while service-role and Avalanche signer material remain server-side only.

Purpose	Command
Install	cd project && npm install
Unit tests	cd project && npm test
Production build	cd project && npm run build
Smoke flow without live anchoring	cd project && npm run smoke:phase2
Daily reviewer anchor flow	cd project && npm run automation:reviewer-anchor
Bootstrap reviewer/automation accounts	cd project && npm run bootstrap:reviewer
Verify GitHub sync	git rev-parse --short HEAD && git rev-parse --short origin/main

Commands already run for this packet

npm test passed: 4 test files and 15 tests. The production build completed successfully with the Netlify production VITE environment and Avalanche default network set to mainnet. GitHub main matched origin/main at commit 0778fc0 before this submission packet was generated.

Evidence Package Index

Artifact	Repository path
Submission packet	project/docs/grant-review/forg3t-avalanche-phase2-submission-packet.docx

Reviewer runbook	project/docs/avalanche/reviewerRunbook.md
Anchor article	project/docs/avalanche/avalanche-anchor-article.md

Recommended Evidence Package for Avalanche

- This Word packet and the repository link.
- Snowtrace transaction link and screenshot for transaction 0x4f9d253d097808406777ba1b9d67b0ac4baac44d34d1d101cea4a3721559c69b.
- Public verify link <https://buildgames.forg3t.io/verify/636919b6e97441df953d98278bbc0efe>.
- buildgames.forg3t.io reviewer credentials shared securely outside GitHub and outside this Word file.
- Generated JSON, CSV, and PDF report exports from project/docs/grant-review/evidence-artifacts/exports/.
- Walkthrough GIF under project/docs/grant-review/submission-assets/video/.
- Optional external pilot/customer attestation, if Avalanche needs business validation beyond code-side proof.

Final Readiness Statement

Forg3t is ready to submit the code-side Phase 2 disbursement evidence package. The only non-repository gap is external enterprise pilot/customer evidence, which should be provided separately if required by Avalanche review.
